

The rugged tablet

TAG GD700

made with advanced security options.

The TAG GD700 is a 7-inch tablet with advanced security, and the availability of numerous data collection options, including the MRZ + MSR reader. It's versatile, expandable, well sealed, and with visible screen clarity in direct sunlight. The device

VERSATILE. EXPANDABLE. SECURE. offers advanced fingerprint reading and encryption options. The TAG GD700 is for those who need a sturdy state-of-the-art tablet that can run the latest Windows™ software operating system in a package that's larger than any hand-held, but smaller and handier than a full-size tablet.

With a tough, solid base that can accommodate a variety of building blocks, the TAG GD700 is versatile and highly configurable for mobile data capture and logistics tasks in areas such as warehousing, retail, law enforcement, first responders, public safety, field service, surveying, border patrol, and plenty more.
